About Me

Dedicated Angular developer with 2 years of experience in creating dynamic web applications. Proficient in front-end technologies, frameworks, and best practices, seeking opportunities to contribute my skills and expertise to innovative projects.

Experience

Atos Syntel (Eviden)

Associate Consultant

PROJECTS : AXOS BANK

Worked on a banking project called Axos Bank

- Worked on Creating a customer account workflow typically involves steps like customer identification, verification, data entry, and account creation. This is include gathering personal information, verifying identities, and setting up the customer's account with the necessary account type and access permissions.
- Designing an admin portal workflow usually requires creating an interface where bank administrators can access and manage customer accounts. Some common features of an admin portal might include account search, account management, user roles and permissions, transaction monitoring, and reporting functionalities.
